**Royal Commission**  
for the Exhibition  
of 1851

“I would like to thank the 1851 Commissioners and staff for this opportunity. It has been a life changing experience to have had the freedom the fellowship offered. Every interaction with staff has been excellent and the fellowship runs like a well-oiled machine (at least from the Fellow’s perspective) thanks to their efforts”

Dr KC Sivaramakrishnan,  
Research Fellow 2015

“The 1851 Fellowship gave me the best ever start to my independent career. Not only did it help me to make friends across disciplines with other 1851 awardees of my time, but it helped me connect with the incredible previous Fellows. It helped me identify commonalities of character, attitudes and perspectives of thought-leaders in science that I have tried to nurture in my own approach”

Professor Yamuna Krishnan,  
Research Fellow 2002

“The 1851 Fellowship has been one of the defining aspects of my academic career. It has allowed me to focus on developing my own research program, which will form the basis of my work for years to come, and has been instrumental in establishing my career and research profile. I am truly grateful”

Dr Tom Montenegro-Johnson, Research Fellow 2014
